EDUCATION

Yangzhou University — BSc in Software Engineering Sep 2023 – Jun 2027 (expected)

School of Information Engineering (School of Artificial Intelligence), Batch 2023. GPA: 3.58/5.00 (≈85.8/100 credit-weighted average; official transcript to follow).

Ranked 1st in the Software Engineering class by weighted average — 92.42 / 100 (academic year 2025–26).

Relevant coursework: Data Structures · Object-Oriented Programming (C/C++/Java) · Database Management · Software Design & Engineering · Computer Networks · Operating Systems · Linear Algebra · Discrete Mathematics · Probability & Statistics · ASP.NET · J2EE.

HONOURS & AWARDS

- Jiangsu Government Scholarship — provincial-level, 2025
- National Third Prize, China–Russia Industrial Innovation Competition (AI & Robotics), 2025
- Best Team Award, 5th Science & Technology Innovation Competition, 2024
- Excellent Residential Assistant Award, Yangzhou University, 2025
- Excellent Award, Innovation & Entrepreneurship Programme, 2026

AI & SOFTWARE PROJECTS

AI Video Dubbing Pipeline — independent, open source (Apache-2.0) 2026

github.com/sadmanshkib/ai-video-dubbing-pipeline — 13 modules, ~1,100 lines of Python.

- Designed and built an end-to-end automatic dubbing pipeline covering ten processing stages: audio extraction, speech recognition with word-level timestamps (Faster-Whisper), subtitle segmentation, context-aware LLM translation, LLM-based duration optimisation (rewriting each line to fit its original time window), voice synthesis (three interchangeable engines, optional voice cloning), timing adjustment, loudness matching, and container muxing with the original audio preserved as a second track.
- Engineered switchable cloud/local LLM backends sized to a 6 GB consumer GPU, and resumable staged execution so any stage range can be re-run after a failure.
- Measured the system instead of assuming it works: built a re-runnable evaluation harness (repository /eval) and scored two stages against public reference sets — speech recognition WER 3.42 % / CER 1.29 % (100 utterances, LibriSpeech test-clean, 12.0 min audio, 1.57× realtime on CPU) and translation BLEU 36.3 / chrF++ 31.0 on the shipped 9.6 GB model versus 30.7 / 26.4 on a 4B model running 24× faster (98 EN→ZH pairs, OPUS-100 test split); the recognition score was re-derived with an independently written metric implementation.

Product-Video Localisation Pipeline (English → Simplified Chinese) — professional project, open source 2026

github.com/sadmanshkib/pyxis_video_dub-pipeline — ~3,900 lines of Python; delivered dubbed product videos.

- Extended the pipeline for customer-facing industrial product videos with human-in-the-loop review gates, adversarial QA passes that hunt mistranslation and terminology drift, a persistent translation-memory system, and a tight-pacing export mode.

Technical Translation Tooling with Persistent Term Memory — open source (Apache-2.0) 2026

github.com/sadmanshkib/pyxis-catalog-translation — 710 lines of Python.

- Built tooling to translate a large industrial product catalogue (EN → Simplified Chinese) while preserving layout, photographs and untranslated product codes and units; term memory plus scripted QA helpers, packaged as a reusable workflow.

Intelligent Tracked Robot with AI-based Manipulation — China–Russia Industrial Innovation Competition 2025

- Team AIForge Dynamics — National Third Prize. Contributed to an AI-assisted tracked robot for intelligent movement and manipulation; involved in system design, testing and integration within a multidisciplinary software and robotics team.

Hotel Management System — Django + SQLite web application 2025

- Database Systems course project: full development cycle from schema design to a working web application with booking, room and guest data management; version-controlled.

PROFESSIONAL EXPERIENCE

Technical Support Assistant (Internship) Jun 2026 – May 2027

Changzhou Luopanxing Detection Technology Co., Ltd. — technical support and troubleshooting for industrial detection-technology products, client communication and product support; academic internship under a tripartite agreement with the Overseas Education College, Yangzhou University.

Frontend Web Designer Intern 2025 – 2026

BONGO IT SOLUTIONS — designed responsive web interfaces (HTML, CSS, JavaScript) with a focus on usability and clean layout.

LEADERSHIP & SERVICE

- Class Monitor, School of Information Engineering (AI), Yangzhou University — Jun 2024 – Jun 2025 (officially certified)
- Student Assistant, Dormitory Affairs, College for Overseas Education — Sep 2024 – Jun 2026; awarded Excellent Residential Assistant, 2025
- Teaching Information Officer — Sep 2024 – Jun 2025
- Floor Leader, international dormitory — 2024 – 2025
- Founder, The Call of Roots (Bangladesh) — 2019 – present: grassroots initiative engaging children through traditional and local games

INTERNATIONAL EXPERIENCE

- Silk Road Youth Exchange Programme (China–ASEAN Education Cooperation Week) — certified exchange on cultural storytelling and regional engagement, certificate issued Aug 2025.
- Outstanding Performance Award, International Cultural Festival, Yangzhou University, 2025.

LANGUAGES & TECHNICAL SKILLS

- Languages: Bengali (native) · English (fluent) · Hindi (fluent) · Chinese (basic conversational, HSK in progress).
- Programming: Python (applied-AI pipelines — speech recognition, LLM translation, TTS integration; Django), C, C++, JavaScript, Java (coursework).
- Applied AI/LLM: speech recognition (Faster-Whisper), LLM-based translation and text condensation, TTS (Fish Speech, CosyVoice2, edge-tts) with voice cloning, local model serving (Ollama) and cloud LLM APIs, multi-model orchestration, translation memory and terminology control, FFmpeg media processing.
- Web & tooling: HTML5, CSS3, SQL, Git/GitHub, YAML configuration, Microsoft Office.
