EDUCATION

Yangzhou University

Bachelor of Science in Software Engineering — Sep 2023 – Jun 2027 (expected)

College of Information and Artificial Intelligence (College of Industrial Software)

- **GPA:** 3.58 / 5.00 (weighted average score: 85.5%)
- **Class Rank:** #1, based on a 2025–2026 weighted average of 92.42/100
- **Yearly weighted averages:** 83.3 (2023–2024), 80.8 (2024–2025), and 92.4 (2025–2026)
- **Relevant Coursework:** Data Structures, OOP (C/C++/Java), Software Design & Engineering, Database Management, Computer Networks, Operating Systems, ASP.NET, J2EE, Discrete Mathematics, Linear Algebra, Probability & Statistics

RESEARCH

Undergraduate Researcher — Knowledge Distillation for ECG Arrhythmia Detection — Oct 2026 – present

Research team of Dr. Zhijun Xiao (肖志军), Yangzhou University

- **Research topic:** Design and implementation of a knowledge distillation architecture for arrhythmia detection
- **Current stage:** Literature review, problem formulation, and experimental planning, focusing on knowledge distillation and ECG arrhythmia classification

PROJECTS

AI Video Dubbing Pipeline (Python · Faster-Whisper · PyTorch · LLMs · Text-to-Speech · FFmpeg)

- Built a resumable Python pipeline integrating Faster-Whisper, LLM translation/duration rewriting, interchangeable TTS engines and FFmpeg timing, loudness matching and muxing; local inference options for 6 GB VRAM
- **Evaluated components:** WER 3.42%, CER 1.29% on 100 LibriSpeech test-clean utterances; BLEU 36.27 on 98 OPUS-100 EN→ZH pairs. Small, out-of-domain component tests — not end-to-end quality or model-training results

Product-Video Localization and Technical Translation Tooling (Python · LLMs · Audio Processing · QA Automation)

- Developed an enterprise video localization system for industrial product media, implementing human-in-the-loop review gates and tight-pacing export modes
- Designed an adversarial QA module and persistent translation-memory architecture to eliminate domain-specific terminology drift and context errors across localization runs

Technical Documents Translation Tooling with Persistent Term Memory (Python · LLMs · NLP · Document Layout Engine)

- Built a specialized translation system converting technical product catalogs between English and Simplified Chinese while preserving visual layout, media asset placement, and technical units
- Integrated a persistent terminology database with automated verification scripts to validate untranslated product codes and specs

Comic2Video: Manga-to-Narrated-Video Engine (Python · Vision-Language Models · OCR · DAG Scheduler · pytest)

- Built an end-to-end multimodal pipeline converting raw manga pages into narrated video, integrating panel detection, VLM page understanding, script generation, TTS, and FFmpeg video assembly
- Designed a dynamic DAG scheduler with an AI-routing layer that automatically escalates complex pages from lightweight to larger models to optimize local VRAM usage on a 6 GB GPU
- Created a 17-module pytest test suite and rendered 21 complete chapter videos (4–9 min each in H.264/AAC)

PROFESSIONAL EXPERIENCE

Technical Support Assistant Intern (On-site) — Pyxis Lab® Inc. — Jun 2026 – present

Changzhou Luopanxing Detection Technology Co., Ltd.

- Streamlined industrial product support and technical documentation localization (between English and Simplified Chinese) using custom AI translation pipelines
- Reduced localization turnaround time from a full day to 20 minutes, accelerating delivery of customer-facing instruction videos, manuals, and catalogs
- Integrated persistent translation memory and term-control systems to ensure domain-specific accuracy across all technical materials
- Co-developed an after-sales and trial-item monitoring system to track equipment deployment and customer support lifecycles

Frontend Web Designer Intern — BONGO IT Solutions Jun 2025 – Jun 2026

- Developed responsive web interfaces using HTML, CSS and JavaScript, focusing on usability and clean layout
- Collaborated in a front-end engineering team to build and launch 2 production e-commerce applications currently serving active clients

HONORS & AWARDS

- Jiangsu Provincial Government Scholarship, Jiangsu Provincial Department of Education 2025
- National Third Prize, China–Russia Industrial Innovation Competition (AI & Robotics) 2025
- Best Team, 5th Science & Technology Innovation Competition — team leader of Team Goujian 2024
- Excellent Residential Assistant Award 2024–2025, College for Overseas Education, Yangzhou University 2025
- Team Excellence Award, 2026 Innovation and Entrepreneurship Carnival 2026
- Team Special Encouragement Award, "Seeking the Flavour of Chinese New Year" Short-Video Competition 2026

LEADERSHIP & SERVICE

- **Floor Leader / Residential Assistant — College for Overseas Education, Yangzhou University** Sep 2024 – Jun 2026
  Selected for two consecutive terms — the maximum number of appointments permitted per student — managing residence hall affairs and supporting international student needs
  Awarded Excellent Residential Assistant (2024–2025) and earned Excellent Civilized Dormitory honors across consecutive evaluation cycles
- **Class Monitor — international undergraduate cohort of 2023, Yangzhou University** Sep 2024 – present
- **Teaching Information Officer — College for Overseas Education, Yangzhou University** Sep 2024 – present
  Monitored academic delivery and student engagement to collect, analyze, and relay actionable feedback to the faculty
- **Founder, The Call of Roots (Bangladesh)** Jun 2019 – present
  Organizes community activities introducing children to traditional and local games
- **Volunteer service:** Slender West Lake (2023) · Yangzhou University's 7th International Cultural Festival (2026) · international-student dormitory relocation (2026)

INTERNATIONAL EXPERIENCE

- 2025 "Zhi & Xing Guizhou" Silk Road Youth Exchange Program, Tongren University, Guizhou — 18–24 Aug 2025; 48 hours of study. Certificate: China–ASEAN Education Cooperation Week Secretariat and Tongren University
- "Hanyu Jinliang" Chinese Language and Culture Exchange, 2026; Youth League Committee of the College of Liberal Arts, Yangzhou University. Participation with favorable performance recognition
- **Performance commendations:** International Cultural Festival (2025 & 2026) and International Students' New Year Gala (2026), College for Overseas Education; Team Excellence Award, 2026 graduation farewell gala, School of Information and Artificial Intelligence (School of Industrial Software), Yangzhou University

TECHNICAL SKILLS & LANGUAGES

Programming: Python, C/C++, JavaScript; Java and SQL (coursework) · Web: HTML5, CSS3, Django · Tools: Git/GitHub, FFmpeg, YAML, Microsoft Office

Applied AI: pretrained ASR/LLM/TTS integration, local inference via Ollama, staged pipeline orchestration, translation memory and terminology QA

Languages: Bengali (native) · English (fluent) · Hindi (fluent spoken) · Chinese (basic conversational)
